

PRAGYAN PANDEY

Python / Django Backend Developer

Kathmandu, Nepal | pragyanpandey2058@gmail.com | +977 9866730862 | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Computer Engineering graduate with hands-on Python/Django backend experience from a recent full-stack internship, plus a data science foundation (Pandas, NumPy, scikit-learn). Delivered production-style REST APIs, real-time WebSocket systems, and AI-integrated moderation pipelines. Seeking a Backend/Python-Django or Data Science role – open to remote or onsite opportunities.

TECHNICAL SKILLS

Languages: Python (primary), SQL, JavaScript, React

Backend: Django, Django REST Framework, Django Channels, ASGI/Daphne, WebRTC, OAuth 2.0, REST API design

Data Science: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Jupyter Notebook

Databases & Tools: PostgreSQL, MySQL, SQLite, Git/GitHub, Docker (basic), Firebase

EXPERIENCE

Full Stack Web Developer Intern – *Xelwel Innovation Pvt. Ltd.*

Apr 2026 – Jun 2026

- Built and shipped three full-stack Django applications in a professional dev environment: an Inventory Management System, a Police Fine Management Application, and a Movie App.
- Designed relational database schemas and REST APIs with Django REST Framework, implementing CRUD workflows, role-based access, and search/filter features.
- Worked within a live codebase alongside senior developers, following Git-based workflows and code review practices to ship production-ready features on deadline.

Data Annotator – *CloudFactory (Remote)*.

Aug 2024 – Jan 2025

- Annotated 1,000+ images for production AI/ML pipelines, maintaining accuracy above benchmark across sprint cycles.
- Identified edge-case data ambiguities, contributing to annotation guideline improvements adopted team-wide.

PROJECTS

Live Video Chat Platform (Final Year Project) – *Django · Django Channels · WebRTC · Daphne/ASGI*

2026

- Built an Omegle-style random video chat platform with real-time messaging, using Django Channels and Daphne for async WebSocket handling at scale.
- Integrated AI-powered content moderation – periodic WebRTC frame analysis via the Claude API and real-time message filtering using `asyncio.to_thread` and `better-profanity`.
- Refactored the API layer to follow REST conventions, cleanly separating web and API routes.

VaultCall – Private Video Calling App – *Django · WebRTC · AES-256 · P2P*

2026

- Built and deployed a privacy-first video calling platform with peer-to-peer WebRTC connections and AES-256 frame-level encryption, so no video data ever touches the server.
- Designed a zero-log architecture – no IP, metadata, or session storage – with passphrase-protected private rooms; deployed live on Render.

NEPSE Stock Analyzer (CS50P Final Project) – *Python · Pandas · Matplotlib · Pytest*

2025

- Built a CLI tool that scrapes live NEPSE stock data via a discovered internal API endpoint, visualizing price trends with Matplotlib and backed by full Pytest coverage.

EDUCATION

Bachelor of Computer Engineering – Purbanchal University, Acme Engineering College, Basundhara

Jul 2026

CERTIFICATIONS

- CS50P: Introduction to Programming with Python – Harvard University (2026) [\[Certificate\]](#)
- Data Science Certification – mentored program (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn)
